

CLAIMS

What is claimed is:

1. A gaming machine comprising:

5 a display device having a display screen showing an image concerning a game;

sound generating devices generating sound according to the game;

a cabinet, in which the display device and the sound generating devices are provided, the cabinet having an opening on a front face thereof
10 such that the display screen of the display device is viewed through the opening from an outside of the cabinet;

sound transmitting holes for emitting sound generated by the sound generating devices, the sound transmitting holes being disposed on left and right side of the display device; and

15 sound transmitting passages extending from the respective sound generating devices to the respective sound transmitting holes.

2. The gaming machine according to claim 1, wherein the sound transmitting holes are disposed in sound transmitting sections, each of
20 which has a vertically long shape, and the sound transmitting sections are provided on left and right sides of the opening on the front face of the cabinet.

3. The gaming machine according to claim 1, wherein each of the
25 sound transmitting passages comprises a substantially constant width in a horizontal direction and an increasing length in a vertical direction as the each of the sound transmitting passages extends towards each of the sound transmitting holes.

4. Th gaming machine according to claim 1, wherein the sound transmitting passages are fixed to the cabinet.
